Profile

Andder Frias I specialize in building modern, clean, and elegant web applications using C#, .NET, React, and Angular, with a strong focus on UX/UI design. My portfolio showcases a diverse range of web and desktop applications, reflecting my versatility and experience in various areas of software development. I'm passionate about user-centered design and eager to expand my skills by contributing to engaging mobile app interfaces. I'm looking for a position that challenges me and provides opportunities to work on innovative projects, while supporting my growth in software development. Projects

DENTAL-CARE: DESKTOP APPLICATION FOR DENTAL PRACTICES

Led the end-to-end development of DentalCare, an advanced management solution for dental practices, crafted with C# and Windows Forms, alongside SQL Server. I designed a robust, user-centered interface for seamless management of patient records, appointments, billing, and treatment tracking. This intuitive and efficient system received high praise for its ease of use and significantly improved administrative workflows, boosting productivity within dental practices.

ELIPSON RENT-CAR: COMPREHENSIVE CAR RENTAL MANAGEMENT PLATFORM

Developed a full-featured rental management system designed to streamline every aspect of the rental process. Core functionalities include streamlined booking, fleet management, and integrated payment processing, supporting real-time bookings and vehicle availability tracking. This system improved the customer and operator experience by enhancing booking efficiency, transparency, and operational management.

DATACARDIO: WEB PLATFORM FOR CARDIOVASCULAR DATA MANAGEMENT

Built a modern, data-driven web application tailored for recording, analyzing, and visualizing cardiovascular patient data. Developed using .NET and React, DataCardio provides healthcare professionals with a reliable tool to monitor cardiovascular trends, support early detection of issues, and make data-backed decisions to improve patient outcomes. The platform's clean design and high-performance capabilities support better care delivery and patient engagement.

Education

Universidad Autónoma de Santo Domingo – Degree in Computer Science – 2024.

Skills

Experienced in agile development and structured processes.

Skilled in delivering user-centered solutions.

Clear communicator of complex technical concepts.

Proficient in CI/CD pipelines and Git.

Proactive problem-solver with a positive mindset.

Strong ownership and accountability for ideas.
